

Thursdays with Team 1511!

Who knows
what day it is?

It's
**SAFETY
DAY!**

While every day should be a safe day for a robotics team, on **Thursdays**, our team gives an extra spotlight on safety.

Team 1511, approaches Safety as if they were a manufacturing location:

- ❖ Weekly Safety Talks – fun with a message.
- ❖ Upgraded Team Safety Manual - includes sections on soldering, battery handling, stored energy and other topics.
- ❖ Periodic Safety inspections of the shop and lab areas throughout the season
- ❖ Incident reporting / corrective action program
- ❖ MSDS's of materials used for the robot, crate and cart building process collected.
- ❖ Safety topics included in Team Test –required for all students.
- ❖ MSDS's were provided to the front office to ensure that the school has a complete set of the materials used in the shop.
- ❖ Team has purchased a full size first aid kit to the school. It is hanging in the shop area.
- ❖ Mentors and travelling parents received CPR / AED Training paid for by the school district.

2009 Safety Talk Topics

Eye Protection
Stress Management
Hand Tool Safety
